"Spiral out. Keep going."

Summary

I am a software engineer with 3+ years of experience specializing in front-end development. I love optimizing workflows and I am looking forward to implementing and working with a design system. I feel very excited to delve deeper in the paradigms of functional programming. I enjoy working in cross-functional teams and getting out of my comfort zone.

Experience

WORTH Internet Systems   *The Hague, Netherlands*

LEAD FRONTEND DEVELOPER   *Jan. 2018 - Jan. 2020*

- Project Kairos a digitization of the visa application process for the dutch ministry of foreign affairs.
  Developed new features/requirements for the application.
  Performed code reviews.
  Documented technological decisions and best practices.
  Set up the E2E testing project for our testers.
  Set-up our build and release pipelines in Microsoft Azure.
  Closely communicated with the designer and the client to identify the requirements for the application.
  Was the security champion for our team.
  Was the backup scrum master.
  Technologies/Methodologies used: Angular, NGXS, BEM, Broadcast Channel API, pdf.js, Spectator, CodeceptJS, Spring, Hibernate, MySQL, Docker, Microsoft Azure.
- Organized several chapter meetings with fellow frontenders.
- Organized the first two interntal AMA's.
- Performed technical interviews for new candidates.

EagleScience Software   *Amsterdam, Netherlands*

FULLSTACK DEVELOPER   *Apr. 2017 - Jan. 2018*

- `https://playtowork.nl/`
  Mainly developed the CMS for the android application PlayToWork, in which students play games and they are matched to available jobs.
  Technologies/Methodologies used: React, Redux, Cordova, GraphQL, Relay, PHP, Laravel, MySQL.
- `https://eaglescience.nl/?portfolio=digiz`
  Mainly developed the front-end for DIGIZ, a digitization of a method called GIZ to estimate care needs of parents and children.
  Technologies used: Angular, Cordova, Scala.
- `https://eaglescience.nl/?portfolio=neurostars`
  Developed the initial workflow mainly using Scala for passing DICOM files through the different stages for the web application Neurostars.
  Technologies used: Play, MySQL, Docker, Jenkins, Angular.

Education

TU/e (Eindhoven University of Technology)   *Eindhoven, Netherlands*

BSc IN COMPUTER SCIENCE AND ENGINEERING   *2013 - 2017*

IEK OMIROS   *Athens, Greece*

VOCATIONAL TRAINING CERTIFICATE AS A COMPUTER NETWORKS TECHNICIAN   *2007 - 2009*

Skills

Front-end	Typescript, Javascript (Angular, React, Vue), HTML5, CSS (SCSS, BEM), Webpack, Redux
Back-end	Java(Spring, Hibernate), PHP (Laravel), Scala (Play), C# (Unity), Python, Swagger, GraphQL, SQL
DevOps	Docker, Microsoft Azure, Jenkins
i18n	English, Greek, Dutch
Other	Jira, Git, Gherkin, Confluence
